

Read-1

The desert

The desert is land with very little moisture .It is usually covered with sand . Most deserts are very dry and hot .It seldom rains on the desert . Sometimes years pass without rain.

During the day the land is very hot . After sunset the land cools quickly .By midnight the air is very cold .

Some plants grow on the desert .The most common plant is the cactus . It stores water inside . The cactus has thorns . These thorns protect the cactus from animals and people who want to take the water .

Many animals live on the desert . The best suited for this life is the camel . It can go the longest without food and water.
