First Term English Test 2

Part One: Reading

A/ Comprehension (08pts)

Read the text carefully then do the activities.

The Social Networking System, Facebook, launched in 2004 by the founder Mark Zuckerberg, is one of the most important breakthroughs in the 21st century. Facebook is now an integrated part of every college student's life.

Facebook is used by more than 800 million people around the world yet little do people know of the profound effect that Facebook has on **their** physical, emotional, and mental health. A collection of studies that include surveys, interviews, and questionnaires will reveal the effect of Facebook on students' well-being. Studies indicate that Facebook can impact physical health by increasing the chance of Upper Respiratory Infection (URI), mental health by leading to web addiction, feelings of loneliness, narcissism, stress, and body dissatisfaction. It alters the traditional familial systems that have existed since the beginning of human life.

It is important to be aware of some of the downsides of Facebook in order to avoid being a victim of **its** unhealthy uses. Many people are unaware of the great impact of Facebook on their life when self- awareness is needed. Acknowledging and becoming fully aware of the nature of your problem is a pre- requisite to solving it. It is important so as not to lose confidence, family connections, and to maintain a healthy body and mind.
