## The First Term Test of English

Class: TCST

### PART ONE: READING

Read the text carefully then do the activities

Communication technology is invading our life more than ever before. Mobile phones are never farther than a reach of our hands away. Emails, social networks, the internet are more present than ever before. More than 60% of all internet users also communicate via social networks and over 85 % of all teenagers have accounts on social networks.

Psychologists have started to define terms like Facebook addiction in **their** reports. Social media sites can be so addicting that people, especially youngsters, do not want to spend time with anything else, they live their relationships in a virtual world.

People often choose to talk to each other via mobile phone, Skype or communicate via Facebook because they may be afraid of getting to know each other, face to face. However, by doing this, they are missing out on their partner's facial expressions or the gestures that the other makes. Emotions are reduced to *Likes* or *Dislikes*, smiley faces or other emoticons.

Facebook has defined privacy in a new way. Many things that should be private have become public. Social media has changed the world. Facebook, Twitter and others are omnipresent. **They** are the last things we worry about when we go to bed and the first things we check on when we get up.

### A.COMPREHENSION. (7pts)
