Third term Exam  Text:  The tiger, one of the most magnificent animals in the world, is also one of the most endangered species in the world, is also one of the most endangered species in the world. A cat of beauty, strength, and majesty, the tiger is a master of all and subject to none, except humans! According to the USA's Endangered Species Act, an endangered species is an animal, plant or any other kind of wildlife that is likely to face extinction in its natural habitat.  The tiger's numbers and habitat have been reduced by up to 95 per cent since 1900. Of the eight original subspecies of tigers, three have become extinct within the last 60 years; and there are less than 50 South China tigers left on this planet, and possibly none, survive in the wild. Tigers increasingly compete with expanding human population and industry for land and food, and many are killed by hunters who sell their skins and body parts as ingredients for traditional Chinese medicines.  If these trends continue, the wild tiger may evolve from being an endangered species to become an extinct species. A few of the remaining endangered subspecies may survive only in zoos; others will live only in stories, pictures and myths, never again to roam the earth.  Www.tigersincrisis.com  Part one: Reading comprehension; (7pts)  Task 1:Read the text carefully and answer the following questions: (2pts)  What is an endangered tiger become an extinct species?
