

Second Term English Exam

Level : 4Ms

Time : 01h 30

Text:

Greedy companies have found a new way of selling their products to children: Internet games. The world's junk food makers are trying to sell their burgers, chocolate and soft drinks to children **who** play online. A report says that more than 80% of the world's food companies are using this tricky new method. It also says that online advertisements are more effective than TV advertisements at hooking children.

The report sadly brings a new word into the English vocabulary: the "advergame". This is a technique to get children hooked while they are having fun online. In addition, many other marketing tactics are used to get kids to spend long periods of time online. The food companies fill the games with logos and advertisements. Children can increase their chances of winning games by buying the products. Many people are worried about the role **that** food advertising plays in childhood obesity
