

Full Name:

Class:

Third Term Exam

Text:

Pollution is an environmental concern for people throughout the world. One university study suggests that pollutants in the water, air, and soil cause up to 40% of the premature deaths in the world's population. The majority of these deaths occur in developing countries.

Water in many developing countries is contaminated with toxic chemicals, also known as toxins. The World Health Organization (WHO) estimates that 1.1 billion people have little or no access to clean water; Therefore, approximately 80% of infectious diseases in the world are caused by contaminated water.

Air pollution is a growing problem throughout the world. The smog, which is full of chemicals and carcinogens, gets trapped inside where families eat and sleep. Outdoor pollution also causes disease and illness, especially in industrial cities such as Beijing, China, **where** cancer is the leading cause of death.

Soil pollution is also a major concern, **it** causes major health risks to entire ecosystems. **This type of pollution** reduces the amount of land suitable for agricultural production and contributes to global food shortages. Farmers in poor nations grow food in contaminated soil both to earn a living and to avoid starvation.

As more people move to urban centres, premature deaths caused by pollution are expected to increase worldwide. Today, the developed nations **who** achieved their wealth at the expense of the environment will be held accountable for protecting the earth's resources for future generations.

A\ Reading comprehension:

a\ Read the text and answer the following questions: (2pts)

1)- What are the types of pollution mentioned in the text? (1pt)

.....

2)- Where do the majority of premature deaths occur? (0,5pt)

.....

3)- What do poor nations do to avoid starvation? (0,5pt)

.....

b) Say True, False or Not mentioned. Correct the wrong statements: (2pts)

- Pollution is an environmental concern for people only in specific regions

- Pollutants cause up to 40% of the premature deaths

- Cancer is the leading cause of death in America

c) What do words/expressions in bold in the text refer to? (2pts)

where **It** **who**

This type of pollution

B) Mastery of language:

a) - Match each two sentences using the following connectors: Therefore, As, So, Because **(3pts)**

1)- Many people on Earth have no access to clean water
- most of infectious diseases in the world are caused by contaminated water.

2)- Farmers in poor nations grow food in contaminated soil
- Suitable lands for agricultural are polluted.

3)- more people move to urban centres
premature deaths caused by pollution are expected to increase worldwide.

b) - Complete with the correct verb tense and the suitable comparative adjective: (3pts)

1)- For the few last years, The developed nations (to be)..... (wealthy)
developing countries.

2)- The World Health Organization (to estimate)..... statistics since 1948. These
statistics (to be)..... (usefull)..... others.

c) - Correct the following sentences: (3pts)

1) - Humans should throw their garbage anywhere.

2) - People mustn't think more about environment.

3) - We shouldn't eat healthy food.

C\Situation of integration (5pts):

Pollution occurs when ecosystems cannot get rid of substances introduced into the environment. It affects nature, plants, humans and even animals.

- Write a short paragraph about how to stop pollution and littering and how to protect your environment.

- Use these cues: put your litters in the bin - be aware - follow the (3 RS) -

Use reusable bags.....etc

- Use must/ mustn't/ the imperative/ therefore and because.
