

Third Term English Exam

Text:

Imagine living in a world where each part of it is suffocating. People, plants, and animals are all under one danger called “pollution”. **The latter** is the biggest problem of this age. There are many kinds of pollution that make life difficult, unhappy and unhealthy.

People no more breathe fresh and clean air. That’s why most of them are subjected to allergies and respiratory diseases. Plants grow up in dirty lands and no longer drink clean water. Therefore, our land has lost its colorful and bright smile. Even animals have been in danger all the time. They have faced the arrows of pollution from all the sides.

Today, our slogan as one concerned unit should be “**THERE IS NO PLANET B**”. We must take care of the only planet we have. People should co-operate and make more efforts to create a world where all the living beings can live happily ever after.

*Written by the Teacher*

**Part One: (14 pts)**
