## ENGLISH 2"TERM EXAMINATION

Level :1"Year

Streams: Scientific and Literary

Timing: 2 hours

## PART ONE: READING (15 pts)

A-Comprehension (8pts)

Read the text carefully and do the activities.

Beach pollution is an international issue. In the year 2002, it caused at least 12,184 closings of beaches in USA. This issue is hazardous to both people's health and the environment. A

Pollution in USA beaches results from high levels of harmful microorganisms found in untreated sewage released directly or indirectly in rivers, seas and oceans. As sewage 1 full of bacteria and vfuse), swimming in water contuminated with sewage can cause respiratory illnes and ear, nose or throat infections. Fish grown in sewage-contaminated waters can cause food poisoning because they concentrate toxins in their\_tissues.

Additionally, people at the beach leave behind them treah and litter, mainly composed of, bottles, cans, cigarette filters, and plastic bags. This litter kills wildlife, and costs millions of dollars to clear it up. Besides, turtles mistake plastic bags for jellyfish and eat them. Thus, they block their commands, which often leads to death from starvat. Scabirds mistake floating plastic litter for food, and ever 90% of them were found dead with plastic in heir stomachs.
