

A/Part one : Reading

A.Comprehension (7pts)

Instagram is an online photo-sharing and social networking service **that** enables its users to take pictures, apply digital filters to it, and share them on a variety of social networking service. Such media sites include Facebook or Twitter. A distinctive feature is that it confines photos to a square shape, similar to Kodak Instamatic and Polaroid images,

Instagram was created in October, 2010. The service rapidly gained popularity. By December 2010, Instagram had 1 million registered users. In June 2011 Instagram announced it had 5 million users and it passed ten million in September of **the same year**. In April 2012, it was announced that over 30 million accounts were set up on the social network. Recently made headlines with its efforts to keep the "Insta-universe" as a positive space and has prohibited any hashtags or photographs that promote self-harm. There are basic Terms of Use that Services. By May 2012 58 photographs were being uploaded and a new user was being gained each second. The total number of photographs uploaded had exceeded one billion. In my opinion Instagram is a refuge for all of us young adults who want to run away from the adults taking over Facebook.

Either way which ever you choose they are both a fun and new way to interact and communicate with old friends and family and to make new friends from all around the world. It is one of the many advantages of the modern technology. If I had to choose one I would pick Instagram people are nicer here and it is a lot less drama, I mean have you ever heard of a couple breaking up over Instagram? I did not think so. But Facebook was my first love, and who can forget their first love, looks like I am stuck in my love triangle for a long time.

1. Choose the letter that corresponds to the right answer. (0.5 pt)

- a. The text is about **a)** how to create an Instagram account **b)** the evolution of Instagram **c)** facebook.
