**Abd Elkadder Medakan Secondary School** Level: 2<sup>nd</sup> Year ES+TM

## **Second Term English Examination**

Part One: Read the text carefully, and then do the activities. (15 pts)

Science has provided us with swift means of communication. The railways have removed all those dangers and difficulties <u>that</u> man had to face during a journey in the past. In the aero plane, he can fly like birds. The globe has shrunk and the world has become a small place. Science has controlled time and space. Still more wonderful is the invention of the wireless internet. It is now possible to talk to a person at a distance of thousands of kilometres.

Additionally, Science has invented many wonderful machines. Electricity is another wonder of science. It has turned nights into days. In the winter, it heats our rooms and, in the summer, it cools them. <u>It</u> moves our fans and other machines. Science has also achieved wonders in the field of medicine. There is now a cure for all kinds of illnesses.

It is not possible to enumerate all the wonders of modern science. Every day, <u>we</u> hear of a new wonder. It is hoped that the peaceful use of every bit of science would bring in an age of prosperity, that the world has never seen before.
