

The Third Term Exam Of English

**PART ONE: Reading and Interpreting (15 points)**

Read the text carefully then do the activities

On the day of the celebration of the Aïd el Fitr (Islamic Feast), very strong flooding took place in all the towns of the valley of the Oued (stream) Mzab, of which Ghardaïa is the capital city, at around 600 km south of Algiers in the middle of the Sahara desert. This was a historical flood because such a one had not been seen since more than one hundred years ago.

I went there three days after the start of the flooding, and I was able to observe by myself the magnitude of the damage, the disarray of stricken population and the apocalyptical landscape that followed. Material damage is tremendous. According to official statements, there were around fifty dead only in the city of Ghardaïa, but the figure of a hundred dead and missing people is certainly closer to reality.

Happily, there have been no dead or wounded among the people I met; however, two of them had their houses severely damaged.
