## Problem solving

1. 20 people are on a bus. When it stops, 4 people get off, and 6 get on. It stops again and 4 people get on. It stops again, and 5 people get off.  
- How many times did the bus stop? .....

2. **Bags and Beads:** You are given 5 bags. There are 10 beads in each of the bags. In four of the bags, the beads each weigh 10 kilograms. In the remaining bag, each bead weighs only 9 kilograms. All the bags and beads look identical. You must find out which bag has the lighter beads. The problem is that all the bags look

identical and all the beads look identical. You can use a scale, but it has to be a single-tray scale, not a two-tray balance scale. Also, you may use the scale only once. How can you find out which bag has the lighter beads?

**Answer:** .....

.....
